June 1, 2015

This year's AES Software Subscription Service (SSS) renewal provides you with the research and development efforts completed during 2014-2015 and prior years. Throughout the year of each release, AES continues to update its products not only to improve its existing software, but also to implement new features requested by our users. We view user-requested features as a core component of our continually improving software suite. This year's upgrades include enhancements to all programs, including the following new features:

- Windows 10 support
- Export PIPEFLOW output to AutoCAD-compatible DXF files
- Microsoft Excel-based visualization tools for RATSC and FLOODSC output

With SSS 2015, you will be given access to the new AES 2015 release, and your software technical support and maintenance will be extended for another year. As with prior releases, you also will be provided up to two free admissions to an AES course to be held in the summer of this year, if attendance permits. Also, your subscription includes searchable PDF versions of all of our published software manuals.

AES 2015 will be available for download from the AES website on AUGUST 1. A BETA release is available now on request while we run final confirmations against Windows 10. A CD mailer is available on request for a shipping and handling fee of \$19.95.

Please review the attached materials regarding your year 2015 subscription, and if you have any questions or comments, please feel free to contact us by phone or at support@advancedengineeringsoftware.com.

Thank you for your continued subscription to AES. We strive each year to continually improve the software with new features and legacy upgrades. AES continues to value your comments as to recommendations to the programs and comments regarding any aspect of the programs and software support. If you have a suggestion for a new feature, a comment about a way for us to improve, *please* contact us and we will be happy to respond. Thank you for allowing us to continue to be of service.

Program Developers:

T. Hromadka, Ph.D., Ph.D., Ph.D., PH, PE, LG, Professor Emeritus, California State University, Fullerton;
J. DeVries, Ph.D., PE, University of California, Davis; **H. Chang**, Ph.D., PE, Professor, San Diego State University;
P. Zannetti, Ph.D., President, EnviroCOMP; **R. Whitley**, Ph.D., Professor Emeritus, University of California, Irvine;
